

# Martha's Vineyard Traffic Crashes

## Persons Sustaining Non-Fatal Injuries

### Years 2012 thru 2014\*

Most current data available from MassDOT as of 1/10/17

**NOTES:**  
 Crash Data is submitted by local police departments to the RMV. MassDOT then geo-codes that information based on the crash's address location or descriptive information provided about the location (i.e. 0.5mile south of Roundabout Intersection).

\*Data provided by MassDOT in August of 2016. For Chilmark: No crashes reported in 2012; only one crash reported in 2013; & only three crashes reported in 2014. For Aquinnah, no crashes were reported from MassDOT for this three year period.

\*\*\*Data omissions occur on this map due to lack of crash reporting to the RMV or insufficient information available to geo-code crash location. MassDOT geo-coded 81% (503) of the reported crashes (623) for this three year period.

\*\*\*\*The MVC applied a 75m buffer around each accident location. Those 75m buffer circles that overlapped each other were dissolved into one area. The number of crashes falling within that area were summed. These crash totals are displayed at the center of the area.

**DISCLAIMER:**  
 Data provided are for planning purposes only. The data are not adequate for boundary determination or regulatory interpretation. The MVC cannot be responsible for how these data are used or interpreted by the end user.
