Contents

1. Introduction and Summary

2. Labor and Employment

Unemployment rate: Edgartown, county, state, 2023 (monthly) 3
Monthly unemployment rate: Edgartown, 2019-2023 (monthly) 3
Seasonal unemployment rate: County, Chilmark, 2014-2023 4
Annual unemployment rate: Towns, 2014-2023 4
Inflow and outflow of workers: Towns, 2021 5
Inflow and outflow of workers: Edgartown, 2012-2021 6
Gross flow of earnings: County, 1990-2022 6
Median household and family income: Towns, 2012-2022 7
Income per capita: Towns, 2012-2022 7
Median household income: Ranking by town, 2012, 2022 7
Industry rankings: Edgartown, 2022 7
Average monthly employment and total wages: Edgartown, 2013-2022 8
Selected industries in Edgartown: Seasonality (employment), 2017-2023 8
Establishments and average monthly employment (all major NAICS sectors): Edgartown, 2022 9

Selected industries (wages and employment), 2013-2022

Construction 10
Financial Activities 10
Education and Health Services 11
Leisure and Hospitality 11
Professional and Business Services 12
Retail Trade 12
Wholesale Trade 13
Transportation and Warehousing 13
Public Administration 13
Information 14
Private Households 14
Services to Buildings and Dwellings (including landscaping) 14
Membership Associations and Organizations 15
Average monthly employment and total wages: County, 2013-2022 15

3. Municipal Finances

Total operating budgets: Edgartown, 2012-2024 16
Total operating budgets: Towns, 2015–2024 (percent change) 16
General fund revenue and expenditures: Towns, 2012-2022 17
General fund revenue and expenditures: Percent change by town, 2013-2022 17
General fund revenue by town: Breakdown for 2022 18
General fund expenditures by town: Breakdown for 2022 18
Enterprise and Community Preservation Act Fund Revenue: Towns, 2015-2024 19
Town revenue by source, (not including Enterprise and Community Preservation Act funds): Towns, 2022 20
Bond ratings by town and agency, 2014-2023 20
Assessed value by town and class: Towns, 2024 20
Total assessed value by town, 2003-2024 20

Tax rate by town and class: 2024 22
Residential tax rate by town (per thousand of assessed value), 2011-2024 22
Average single-family tax bill: Towns, 2012-2024 23
Average single-family tax bill and ranking: Towns, 2024 23
Vehicle excise collections: Towns, 2007-2023 23
Local option rooms tax: Towns, 2015-2024 24
Local option marijuana tax: Towns, 2022-2023 24
Local option meals tax: Towns, 2015-2024 24
Total outstanding long-term debt: Towns, 2014-2023 25
Debt service as percent of town budget: Towns, 2014-2023 25
Community Preservation Act: Approved projects, 2013–2023 26
Community Preservation Act: Approved projects by town, 2014-2023 26
Community Preservation Act: Local surcharge and state match (percent) per town, 2002-2023 27
Community Preservation Act: Total amounts charged by town and distributed by state as of 2023 28

4. Business Inventory

Property type, number, appraised value (percent of total): Edgartown, 2023 29
Tax levy by class: Edgartown, 2020-2024 31

1. Introduction and Summary

This report gathers publicly available data from local, state, and Federal sources, to illustrate recent economic and municipal finance trends in Edgartown. In many cases, data for other towns in Dukes County, and for the state as a whole, are included for comparison. Most of the data sets cover 10 years, although the most recent year may differ depending on the source. The report draws largely from the 2023 Martha's Vineyard Statistical Profile, which covers a wide range of topics in Dukes County. As with the Statistical Profile, this report is meant to be used by town officials, businesses, nonprofits, and members of the public for general planning purposes. Below are some initial comments and observations.

Covid-19 Pandemic

The period covered in this report includes the Covid-19 pandemic, which affected local economies around the world. Most of the effects on the Vineyard peaked in April 2020, and have since rebounded to varying degrees. Total wages and average monthly employment typically dropped in 2020, but but wages less so than employment. As shown on pages 10-13, the industries in Edgartown most affected in terms of average monthly employment include leisure and hospitality (especially accommodation and food services); trade, transportation and utilities (mostly retail); and construction. Total annual wages in Edgartown dropped about 5%, and average monthly employment about 17%, at the height of the pandemic in 2020. Since then, wages have returned to the usual growth pattern, but average monthly employment remains below pre-pandemic levels. Two reasons for the differing effects on wages and employment is likely the response of wages to the rising cost of goods and services since 2020 (the annual Consumer Price Index in the Northeast grew about 15% between 2020 and 2023), and the phasing in of the new Massachusetts minimum wage of $15/hour between 2020 and 2023.

Property values increased dramatically during the pandemic, following a nationwide trend where many people sought refuge in rural counties. (Interestingly, of the approximately 510 new Island residents in 2021, about two-thirds left the Island in 2022 or no longer resided here full-time, with a similar decline in 2023.[1] The increase was likely due in part to more year-round use of existing seasonal homes.) The spike in property values led to lower tax rates in every Island town, although the average single-family tax bills continue to rise across the Island, with the exception of Edgartown, where the figure has declined slightly since 2019.

Economy and Seasonality

Despite its seasonal appeal, Edgartown has become increasingly year-round in terms of its economic activity. Since around 2012, for example, unemployment has declined most in the off-season, about 135 fewer residents commute elsewhere for work, and about 170 more workers commute to Edgartown from other places. In 2021, Edgartown had the county's highest percentage of residents who work in town (49%), and in 2022 about 62% of all residents were estimated to be in the labor force, which was about average for Dukes County. Employment generally peaks in summer, but especially in regard to leisure and hospitality, retail trade, and "other services" including membership associations, civic and social organizations, personal services, and other sub-industries. As one indication of the growing year-round economy, employment in certain industries such as professional and business services, and financial activities, have fluctuated somewhat less with the seasons since around 2017. (See note on Labor Market Information on the following page.)

The largest industry in Edgartown in 2022, in terms of average monthly employment, was that of trade, transportation, and utilities (mostly retail, 747 employees), followed by leisure and hospitality (745 employees), and construction (302 employees). In 2022, construction accounted for the largest share of establishments in Edgartown (93, or 24%), which was more than any other Island town, and made up about 35% of the 268 construction-related establishments on the Island. At the same time, construction accounted for only about 11% of average monthly employment in Edgartown, which may reflect a larger share of small companies or self-employed workers. Islandwide, construction accounts for about 10% of average monthly employment, 18% of establishments, and 13% of total wages.

Business Inventory

In addition to economic and municipal finance trends, this report includes a local business inventory, based on data provided by the Edgartown Assessor, and an analysis of appraised value by business type and user class. It should be noted that the inventory relies on the Massachusetts Property Type Classification Codes, which are different than the industry classifications used in Section 2. Of Edgartown's 356 commercial and industrial properties, the largest share (18%) are classified as discount and department stores, which account for about 6% of the total commercial/industrial value in town. By contrast, hotels, inns, and other lodging establishments (including motel condos but not Airbnbs) make up 8% of establishments and 28% of total commercial/industrial assessed value. Looking ahead, the town may want to consider conducting a cost of services analysis to compare the cost of town services to the tax revenue received per user group and identify any potential discrepancies in how fees and services are distributed.

[1] Data from the US Census Bureau Population Division.

Municipal Finances

While somewhat distinct from the economic trends in Section 2, municipal finance data is included in this report, since town government is itself a key part of the local economy, providing jobs and essential services that keep the town and its commercial areas running smoothly. Tax revenue, property assessments, town spending, and other trends may also reflect certain aspects of the local economy over time.

Edgartown had the largest operating budget in Dukes County in FY2024, followed by Tisbury and Oak Bluffs, reflecting its large population, relatively dense development, and other factors common to the down-Island towns. But even with its large population, Edgartown had the Island's third-highest operating budget per capita, after Aquinnah and Chilmark, possibly indicating a somewhat lower value in terms of the cost of municipal services per taxpayer.

Edgartown's tax rate of 2.55 is the second-lowest in the state, after Chilmark, due mostly to its extremely high property values. The town's average home price of $2.56 million in 2022 was the second-highest on the Island, also after Chilmark, and its total assessed value surpasses many cities in Massachusetts. The vast majority of tax revenue in Edgartown comes from the residential levy, with commercial property owners paying less than 5% of the total. Along with local receipts, state aid, and other revenue, the tax levy funds a wide range of town services, including education, police and public safety, public works, and other services. Edgartown roughly follows the countywide trends in terms of general fund revenue sources and expenditures, although it spends proportionally more on culture and recreation and police, and somewhat less on education; and receives a greater share of revenue from sources other than the tax levy. In the last 10 years, Edgartown's general fund revenue and expenditures have increased 46% and 40% respectively (about average for the Island), and its outstanding debt has declined consistently.

A note on American Community Survey data:

Some of the data in this report is from the US Census Bureau's American Community Survey (ACS), which provides annual data estimates related to social, economic, housing, and demographic characteristics for particular areas. Unlike the 10-year Census, which in theory accounts for every resident in an area, the ACS is based on a sample of the population. For populations such as Dukes County with fewer than 65,000 people, the annual ACS numbers are based on survey responses over the previous five years. The 2022 ACS 5-Year Estimates, for example, are based on the years 2017-2021.

ACS results are available for each year, but changes over time are shown here in non-overlapping five-year increments, ending with latest available data for 2022. This presents a more accurate picture, since the 5-year estimates have a smoothing effect and do not necessarily reflect year-by-year changes.

Because the ACS is based on a sample of each population, the data comes with a degree of uncertainty, or sampling error, which increases for smaller populations where the sample size is more limited. As such, changes in the data over time may not be statistically significant. It should also be noted that monetary data in the ACS are adjusted for inflation only to the final year in the 5-year period.

For more information on the ACS, we recommend that readers consult the ACS handbook, Understanding and Using American Community Survey Data, and view the data sets directly on the US Census website, data.census.gov, which include the margins of error and other information.

A note on Labor Market Information:

Some of the economic data in Section 2 comes from the Quarterly Census of Employment and Wages (QCEW), also known as the ES-202 program, which is overseen by the US Bureau of Labor Statistics (BLS) and relies on data that employers report to unemployment insurance programs. The data for states and counties are available through BLS, with additional town data available through the MA Department of Economic Research (DER). According to BLS, the program covers about 97% of all civilian wage and salary employment at the county level.

The data is sorted by industry and sub-industry based on the North American Industry Classification System (NAICS), which is the standard used by Federal statistical agencies. Changes over time reflect economic activity such as openings and closures, but may also result from businesses being classified differently from year to year. It should also be noted that the accuracy of industry-level data may be lower for smaller geographies, in part due to data suppression for confidentiality. However, this does not affect the total wage and employment figures for each town.

More information is available on the BLS website, including a Q&A page and Handbook of Methods. A searchable database is available at Mass.gov.

2. Labor and Employment

As with the Island as a whole, Edgartown has a strongly seasonal economy, although each industry responds somewhat differently to the annual cycles. Unemployment across the Island spiked at the onset of the Covid-19 pandemic in 2020, but as of 2023, the unemployment rate in Edgartown has receded to pre-pandemic levels. Overall, the town's unemployment rate has declined over the last decade, including in the off-season.

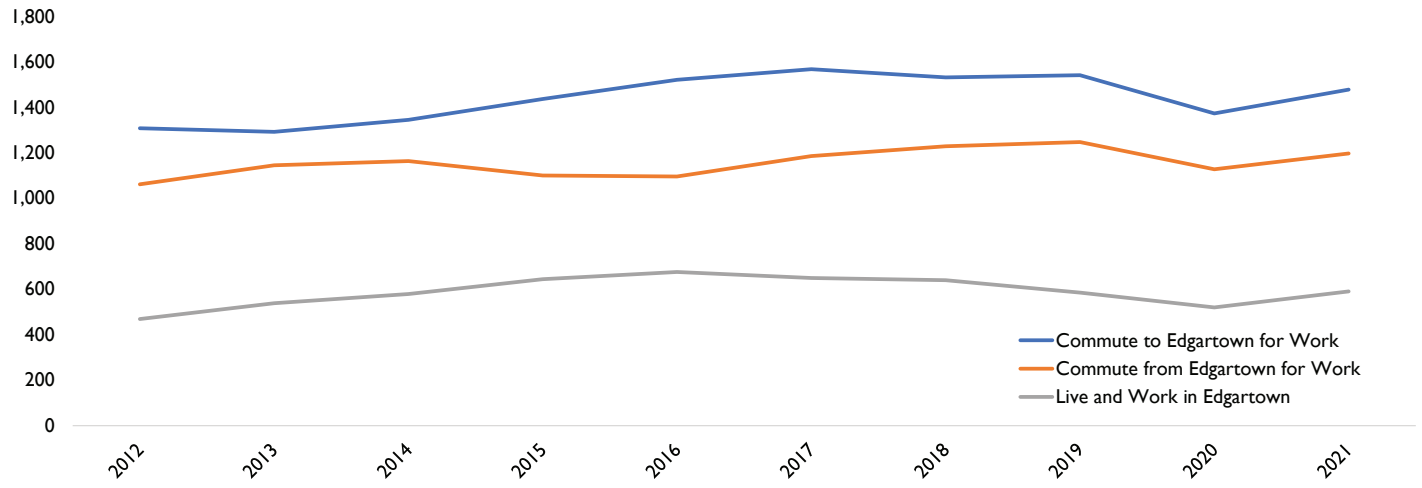
717 - Employed in Selection Area, Live Outside
913 - Live in Selection Area, Employed Outside
214 - Employed and Live in Selection Area

The US Census Bureau estimates how many workers commute to or from an area for work. There are two ways of looking at the data (based on place of residence or place of employment), as indicated on the previous page. Compared to other Island towns in 2021, Edgartown had the highest percentage of town residents who both live and work in town (49%). With their larger populations and more commercial development, the down-Island towns have a higher percentage of people who live and work in town, compared to up-Island.

The first chart below is based on the US Census Bureau's OnTheMap database, showing the estimated balance of workers commuting to and from Edgartown over time. Changes may result from the availability of jobs and employment, or other factors. It should be noted that Dukes County joined the database in 2012, after which there was likely a period adjustment. This may explain some of the variation in the data for Dukes County between 2012 and 2015.

Inflow and outflow of workers: Edgartown, 2012-2021

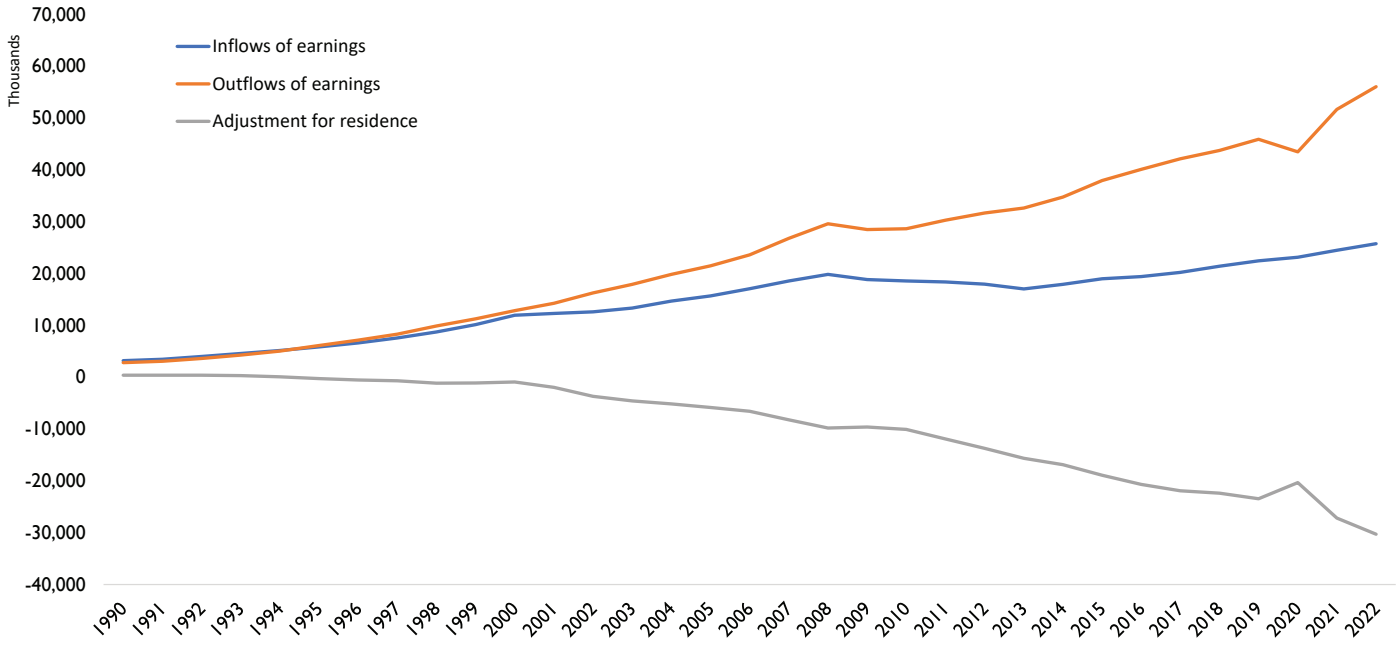
Source: OneTheMap (US Census Bureau, Center for Economic Studies)



Gross flow of earnings: County, 1990–2022

Source: Bureau of Economic Analysis

This chart shows the total annual earnings that Dukes County residents gained from working in other counties (inflow), and the total earnings that people from other counties, including seasonal workers, gained from working in Dukes County (outflow). The difference is called the adjustment for residence. In Dukes County, the outflow of earnings has outpaced the inflow since the 1990s, due largely to the seasonal economy.



Median household and family income: Towns, 2012-2022

Source: American Community Survey 5-Year Estimates (DP03)

In the ACS data, family income measures the income of all family members over the age of 15 living in the same residence, while household income applies to all family and non-family members living together. The median of those figures is the middle value, with half the incomes above and half below. Median incomes in Chilmark in 2022 were lower than both the state and county averages. It should be noted that the margins of error may account at least partly for the variation among towns and over time.

	2012	2017	2022	% change
Aquinnah	$91,875	$80,250	$114,375	24.5%
	$109,688	$80,938	$120,521	9.9%
Chilmark	$61,818	$79,688	$155,938	152.3%
	$79,107	$147,159	$161,985	104.8%

*Year-round employed population over 16

State and Federal statistical agencies usually classify businesses according to the North American Industry Classification System (NAICS), which includes a long list of industries and sub-industries. This is the standard used by the MA Dept. of Economic Research (DER), which provides economic data at the state, county, and town levels.

The industry statistics on these pages provide some insight into the development of various industries and sub-industries in Edgartown between 2013 and 2022. Among other things, the data show that some industries weathered the pandemic better than others, and some that were effected have largely rebounded. Average monthly employment in Edgartown dropped about 17% in 2020, while total wages fell about 5%. Since then, average monthly employment and wages have increased about 14% and 28%, respectively.

Establishments and average monthly employment (all major NAICS sectors): Edgartown, 2022
Source: MA Department of Economic Research

In 2022, construction made up the largest share of establishments in Edgartown (93), followed by trade, transportation, and utilities (mostly retail, 84) and leisure and hospitality (59). In terms of average monthly employment, trade, transportation, and utilities had the most workers (747), followed by leisure and hospitality (745), and construction (302).

General fund expenditures by town: Breakdown for 2022

Source: Division of Local Services

Education makes up the largest portion of general fund expenditures in Dukes County, followed by fixed costs, general government, police, and other costs. The vast majority of general fund revenue comes from the tax levy, followed by local receipts and other revenue. Edgartown generally followed the countywide trends in 2022, but with somewhat more spending on culture and recreation and police, and somewhat less on education; and more revenue from sources other than the tax levy.

Assessed value by town and class, 2024

Source: Division of Local Services

Edgartown far surpasses other towns in Dukes County, and the state average, in terms of total assessed value, with Chilmark, Oak Bluffs, Tisbury, and West Tisbury all in the neighborhood of about $5-6 billion. It's total value of about $13.3 billion (about 93% residential) surpasses that of Oak Bluffs and Tisbury combined, or all the up-Island towns plus Gosnold. Between 2019 and 2024, total values increased about 60% countywide and 89% in Edgartown.

	Residential	Open Space	Commercial	Industrial	Personal Property	Total

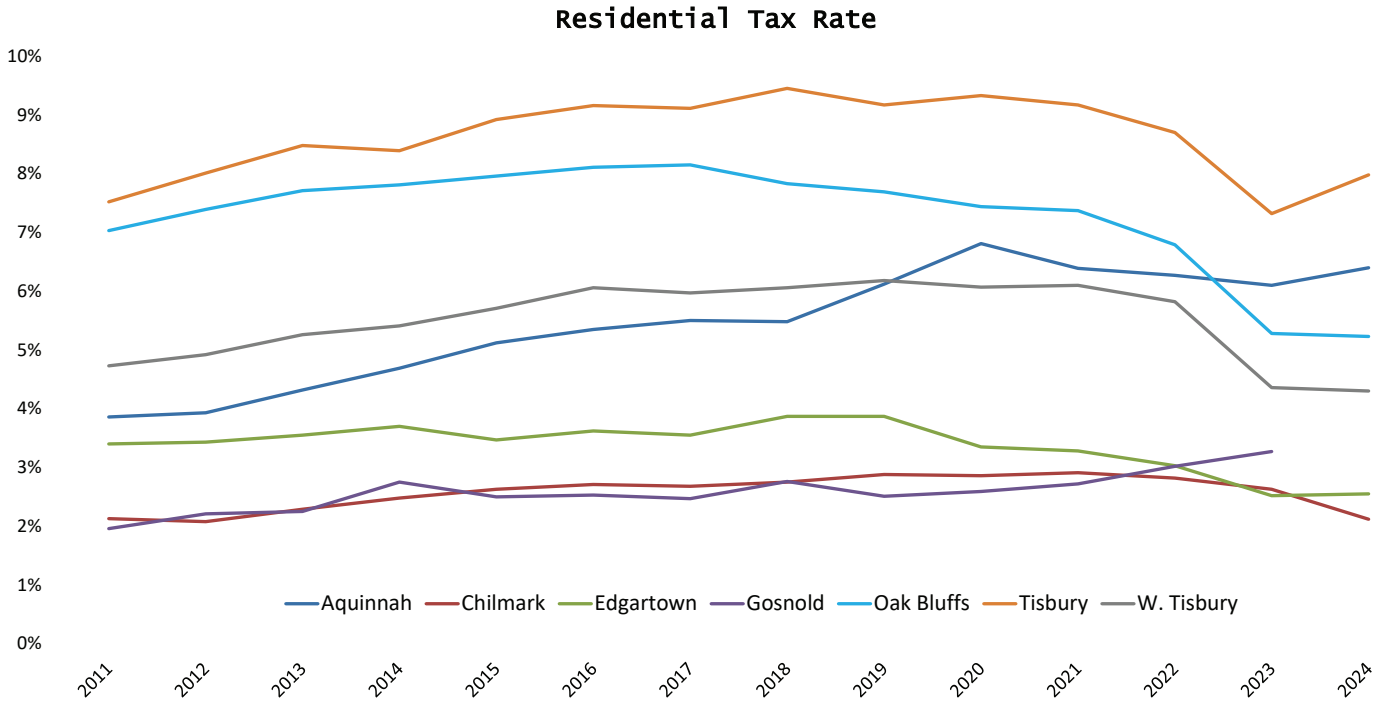
Residential tax rate by town (per thousand of assessed value), 2011-2024
Source: Division of Local Services

Tax rates in all but Gosnold have declined since 2020, especially in 2023, due largely to an increase in property values during the Covid-19 pandemic. Oak Bluffs saw the sharpest decrease from 2020 to 2023 (-29%), followed by West Tisbury (-28%), Edgartown (-25%), Tisbury (-22%), Aquinnah (-10%), and Chilmark (-8%). Tax rates in 2024 generally leveled out, with some slight increases, and a 19% decline in Chilmark.



Average single-family tax bill: Towns, 2012-2024

Source: Division of Local Services

Average single-family tax bills vary according to the amount of other tax revenue in town, the influence of local-option tax receipts, and other factors. The average single family tax bill in Edgartown increased about 42% between 2015 and 2024 (from $4,096 to $5,822), which was less than in the other Island towns. Aquinnah saw the largest increase (81%), followed by Tisbury (65%), Oak Bluffs (43%), and West Tisbury (40%). Statewide, the average tax bill grew about 43% (from $5,187 to $7,403) in the same period.

Local option rooms tax: Towns, 2015-2024

Source: Division of Local Services

Massachusetts charges a 6.25% tax on restaurant meals, and a 5.7% tax on room rentals of 90 days or less, which includes short-term rentals of 31 days or less. In addition, cities and towns may charge their own local meals, rooms, marijuana, and short-term rental taxes. Oak Bluffs and Tisbury have opted into the local meals tax, each charging a rate of 0.75%. Oak Bluffs, Tisbury, and West Tisbury also charge a 6% tax on rooms, while Edgartown, Chilmark, and Aquinnah charge 4%. Tisbury and West Tisbury charge a 3% tax on marijuana products, which they began collecting in FY2022. Rooms tax revenue has increased exponentially in Island towns since around 2019, due largely to short-term rentals.

Community Preservation Act: Approved projects, 2013–2023

Source: Community Preservation Coalition

The number of approved CPA projects in Dukes County has multiplied many times over since the early 2000s when towns began adopting the law, which allows them to collect a property-tax surcharge of up to 3%. The state also contributes a portion of funds to participating towns every year. CPA funds may be spent on open space, housing, historic preservation, recreation, or a mix of those things. The largest portion of approved projects in Dukes County since 2001 has involved historic preservation, followed by housing. Recreation projects on the Island have increased significantly since 2012. CPA projects approved by Edgartown have been mostly historic (79), followed by housing (45), recreation (26), and open space (15).*

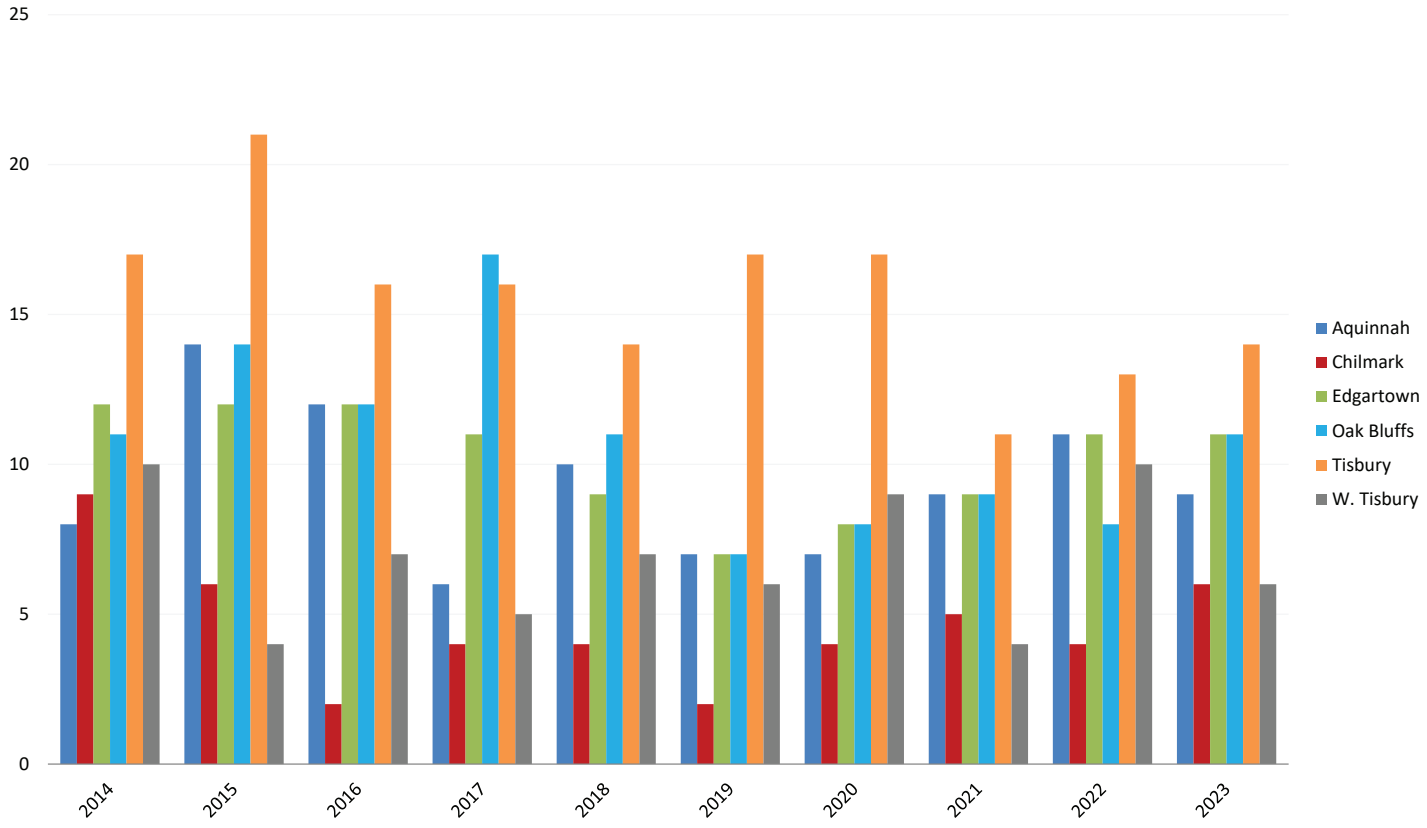
Community Preservation Act: Approved projects by town, 2014-2023

Source: Community Preservation Coalition



Community Preservation Act: Local surcharge and state match (percent) per town, 2002–2023
Source: Community Preservation Coalition

State matches for all towns in Dukes County except Gosnold, which joined later, started out at 100%, then declined in some cases by more than 75% over the years. The state matches for Chilmark and Aquinnah have remained relatively intact, at least partly because those towns were among the first in the state to adopt the CPA. Edgartown's portion reached a low of 22% in 2018, but has risen to 52% as of last year. All towns saw an increase in their state matches between 2018 and 2023.
