

Land Use Change

- Nearly 1/10th of the Vineyard changed from Forested to Low-Density Residential in the last three decades of the 20th century.

Land Use Potential

- As of 2003, 32% of the total acreage of the Vineyard was protected open space, 36% was developed or built, 5% was wetlands, and 26% was "available". Available land, consisting of any vacant land that is neither built nor protected as open space, included 15,435 acres of the total 58,963.
- At "buildout", all 15,435 "available" acres will be accounted for, by development or by protection as open space.
