What Jared said makes the most sense and consistent with Mr. Agassi's understanding.

Subject: RE: 4 State Road

I spoke to Jared on the phone just now, and his understanding was that this project was given an extension to hold wastewater flow allocation until the MVC had made a decision, and that once that decision was made in the negative, the extension should have expired and there would need to be a new application now. So I guess it depends on what the MVC decision was back in 2022/2023, if it was a firm no or if it was put on hold. We have the available capacity now for the project so I don't see why a new application would not be approved, but I am just trying to play things by the books. Please let me know what you all think on this,

Thank you,

Mike

Mike / Rich,

Please let this service as a quick informal intro -

Rich, Mike took over from Jared and is working to confirm flow for the project so we can schedule the public hearing. I am attaching a set of plan for his records.

Mike, Rich is the DRI coordinator for this project. I have also copied in Sheri Caseau at the MVC as she's the water resource planner.

Anything I can do to facilitate please let me know.

Kind Regards,

Xerxes Agassi
