Hello—I am in support of putting resources into maintaining natural grass fields. I do not believe artificial turf is a healthy or financially responsible choice. My father died of mesothelioma 50 years after exposure to asbestos. We are now learning, after exhaustive research, that residue from tires in rain runoff is killing salmon. We should not risk our aquifer with chemicals which may cause long-term harm.

Thank you for your time and energy on this matter.

Sincerely,

Allison Burger

Chilmark
