Re: Lagoon Ridge WWTP – Amphidrome® Treatment System.

Date: 13 April 2022

To Whom It May Concern,

This is to confirm that the treatment system proposed for Lagoon Ridge has been designed to meet a Total Nitrogen (TN) limit of less than ten milligrams per liter (< 10mg/L TN).

F. R. Mahony will provide support for the owner and operator of the system as the treatment system and biological process begins.

If the Commission would like to know more about the Amphidrome® system performance, for example, DMR data showing the ability of the system to achieve the designed discharge limit, we would be happy to provide any support needed.

Best regards,

Andrew R. McBrearty, P.E.
