Subject: Chappy Wisp Wireless Antenna

Commission members:

As summer residents on Chappy (for over 30 years), we strongly support the proposed project of Chappy Wisp to construct and use a Wireless Antenna at their current location in order to improve cell phone reception.

Even though (according to the information on the slide show) after the antenna is finished our home will still be in a wireless cell “dead zone”, having the new capability will contribute to both the safety and the “better good” of all of our neighbors and fellow Chappy residents.

As far as we can tell there are no down-sides to this project. In particular, the possible visual impact caused by the new tower pales before the current obstructions of the landscape caused by *existing* power poles and their accompanying transformers, circuit breakers and lines.

Sincerely,

Steve and Tina Pollock
