Subject: High School Fields

Just a quick note to say I'm in favor of the new fields at the high school...I'm sure that many of the projects that come to your boards involve infrastructure that benefit the summer population...these new fields will really benefit island kids...I moved here from a town in New Jersey that had a few turf fields...they are great...you can play on them in all kinds of weather, and they're really easy on the legs...again, it would be a huge benefit to island kids who want to play sports...kids have lots of choices for activities, and encouraging them to participate in sports is a great thing...

Please support this project! Thank you for volunteering your time to help the island...
