Subject: Support of Phase 1 - MVRHS Track Project

Dear Mr. Turner,

I am an Edgartown resident with 2 kids in MV school systems (one in Oak Bluffs and one in MVRHS). They both play sports and I'm married to the MV Boys Varsity Soccer Head Coach, John Walsh.

We support the project to bring a multi purpose Synthetic Turf Field to our high school. The wear and tear on the current field not only provides career ending injuries to our players but also increases the out of pocket medical expenses on an island whose medical remedies are often too expensive for tax payers to bear without serious financial hardship (even if they do have health insurance).

The turf field is made from recycled materials and will be fully recycled. One turf field will help the natural fields heal, become safer and sustainable in their own right.

Please vote to launch phase 1 of the new track project - it would be considered a vote for our children and their safety as well as a vote of compromise with natural grass supporters.

Sincerely,
Kelley Nagi
