Subject: Please support moving forward with Synthetic turf fields

Mr. Turner,

I'm writing this email in favor of Synthetic turf fields for our community. I am a parent of two children 14 & 13 years of age who play football & lacrosse for our youth and high school programs. Our grass fields are over-used and are in poor condition. Having just one turf field would allow us to rest the natural grass fields, absorbing play during growing season and bad weather. Having been involved with our youth lacrosse program for over six years it is hard enough to get teams to travel here but when they see the "dirt fields" they are reluctant to return. Our kids deserve to have an adequate facility to support those programs.

This project will **not** be a burden to taxpayers with donors that are ready and waiting to help us rebuild our track and athletic campus. I implore you to do the right thing and support the voters.

Thank-you

Kimberly Averill
