Subject: Plastic field

Really? That is where you want to put your time and energy - and finances? **Making a PLASTIC field?** Why don't you put your time and energy and finances into taking care of a ***small patch of God's green earth***. It's not a major job; its some work and people just aren't into "work". Everyone wants a short cut regardless of what effect it will have on our future - and health of the athlete. When in doubt, leave it out!

Honestly, You must be running out of things to do.
