Hello,

I am contacting you to say I think it is wrong to install a plastic playing field.

In my personal life I try to avoid plastic as much as I can so when I hear we have a choice of grass or plastic, it's a no brainer.

I hear people want it because other schools have it and it would set our players back.

Im sorry, winning doesn't stand higher than our mother natures health.

It's time to wake up to our climate crisis and do the right thing.
