Dear Lucy -

Yes, please do let me know whether or not I will fit in to speak tonight. Thanks.

And, how much time is allotted for each speaker?

Also, I am dismayed by the length of time before the next follow-up meeting - Feb 4 is three weeks away!

It shows a blatant disregard for the urgent need to improve our children's playing fields as soon as possible.

It is urgent that the follow-up meeting comes as soon as possible after tonight's meeting - certainly within a week!

The MVC Committee doesn't even have to attend at the time - they can catch up by watching the zoom recording at their leisure.

The purpose of this meeting is primarily let all of us Vineyarders speak our minds about our children's playing fields. We want everyone to consider each other's opinions - this is a decision that must be made by us, the people, not just by the majority vote of the committee members. We are talking about the long-term health and wellbeing of our children.

Thank you very much for the heroic work you must be doing to organize all these people, all caring so much about what is so important to them ! That's where the importance of understanding the facts becomes urgently important - right now, the two factions are split far apart - there is a dangerously low amount of information available. They/We need to push the pause button - to really research and consider the pros and cons of Plastic v Grass v Plastic.

With best wishes -

- Anna Edey
