

Vineyard Conservation Society,

Thank you for taking on the important project.

I am 100% in favor of supporting our students athletes.

I am not in favor of plastic anywhere and am deeply concerned that we would bring this much plastic to our island.

I would like to see natural grass and over plastic turf.

Our island should be working towards keeping PFAS off Martha's Vineyard and toward limited plastic use in general.

Thank you,

Jan Burman
