

Good morning Lucy,

I don't consider myself an activist and I do believe that in certain situations artificial turf is appropriate. I have seen it used appropriately in inner cities where there is only one field, many users etc.

Here on MV the fields can be used and rested at the same time. Artificial turf is a deal with the devil, and we have no reason to make that bargain.

None. Further we need to change our culture, and this is where it starts.

I want my daughter playing on grass.

Thank you for your consideration.
