Subject: plastic "grass"

To the Martha's Vineyard Commission,

I would like to express my philosophical opposition to the proposed plastic field at the Martha's Vineyard Regional High School. Converting a natural grass field to a plastic one runs counter to the island character and sends the wrong message to our youth. Real grass supports ecological life, both above and below the soil surface. Real grass is beautiful. Real grass does not become plastic trash. We should inspire youth and encourage all island residents to observe support and revere nature, not destroy life and replace it with a shamefully poor substitute.

Thank you for your consideration,  
Wendy Forest
