

MCLC Limited Family Partnership recognizes that there is an affordable housing shortage on the island. As a component of the successful completion of the project, ownership will deed an abutting property for workforce housing in perpetuity. Located on Tisbury assessor's Map 19, as parcel 21.4. This approximately half-acre lot, is not located within any special protection districts. This maximizes the contribution, with the possibility of up to a six bedroom structure. This deed restriction will make a positive impact on our island housing crisis.
