

Hi Lucy,

Thanks for responding so quickly to my phone call this morning.

At W.T. assessors map 31, lot 15, we have an undisturbed view of the Doane cell tower across the field. At the original hearing before the W.T. planning board, we acknowledged the need for this structure and noted that the proponent was not obliged to follow local zoning. We urged the board members then to consider a simple monopole structure similar to one already existing off Old Courthouse Road in North Tisbury rather than some elaborate, large, phony redwood tree with plastic foliage which would actually be more intrusive in the local environment.

Over the years we (and others) have seen this plastic "foliage" fall to the ground and become subsumed in the leaf litter where it is impossible to find and retrieve. There is no enforcement mechanism for replacing the " foliage".

The bottom line: 1) No more plastic litter. 2) Form follows function.

If you would be so kind, would you please forward these comments to Doug Sederholm and the other members.

Many thanks,  
Rez Williams  
Lucy Mitchell
