RE: The Barn

BY HAND

As you may know we are in the process of making an addition to the kitchen at the bowling alley.

During our approval process with MVC we noted that we do a fair amount of take-out business which has been very awkward to manage. In each instance a customer has to park, come into the dining room and pay for and pick up their food. During busy times this has caused confusion and congestion in both the parking lot and the dining room. We suggested at that time that we would like to include a take-out window in the addition but were asked not to complicate our request but to return later to discuss the take-out window with LUPC. We would like to do that now.

We have included a window in the kitchen addition. A photograph and sketch are attached. As you can see the location will allow us to create a dedicated parking spot for take-out customers. This should greatly simplify the process.

Thanks,

A handwritten signature in blue ink that reads "Sam Dunn".
