Please see below email sent to the Edgartown Planning Board. Thank you for considering the concerns of myself and other Chappy residents with respect to the proposed AT&T cell tower.

Thank you.

Subject: Chappy Cell

Dear Planning Board Members:

I am a year-round Chappy resident but will not be able to attend next week's Planning Board meeting to discuss the proposed new cell tower on Chappaquiddick. I appreciate the better service the temporary monopole has afforded residents on Chappy and I would not object to a permanent version of that monopole structure with the additional height requested; however, I am not in favor of approving the current AT&T application for the new permanent cell tower on Chappy in the form proposed due to the unsightly external antenna which would be added to the upper section of the proposed pole.

It is my understanding that the Town of Edgartown zoning bylaw makes it clear that any cell facility should use "stealth" technology to hide the antennas if a tower were to be permitted. It is clear that is not the case with the pending application and I would hope that the Planning Board would require the applicant to comply with that requirement before giving any approval to the tower.

Thank you for your time and for taking into consideration the concerns with this project raised by myself and other Chappy residents.
