Subject: Re: abutters of the MV Museum

Re: Generators/construction plans for the MV Museum

As abutters located on Causeway Rd Vineyard Haven with direct impact from all the construction of the Museum - We must voice our opinion on the latest construction plans. We are opposed to any generator and compressors being built near our property line .

We have been in support and excited to have this new beautiful building celebrating the history of our island.

We understand and accept that there will be social events that will run late and generate added traffic and noise to this residential neighborhood.

However, adding "above ground" industrial generators that continually run -placed along the edge of a residential area should not be acceptable.

It seems like the project is being pushed forward with no consideration of the neighbors. I had hoped there was an area more suitable and that the MV Museum would take the abutters into consideration .

Regards,

Mark and Nya Clarke
