

I live at 40 Meetinghouse Way, Edgartown.

I am writing to oppose the development DRI 682 B. This is a major, dense subdivision on small lots that will require substantial infrastructure paid for by taxpayers as well as air, water and ground pollution caused by the density of the development. The proposed wildlife habitat is not large enough to sustain wildlife to any reasonable degree and with automobiles, pedestrians, maintenance vehicles for homeowners, wildlife will not inhabit except maybe an occasional skunk, rabbit or raccoon wandering through.
