

Hi Lucy,

I am writing to express my strong opposition to the Meetinghouse project under review and discussion this evening. As a year round Edgartown resident and a huge supporter of Edgartown Great Pond - we stand firmly with the stance of the EGP Association and the MV Land Commission who believe the development would be catastrophic to the environment. Additionally, we have considerable concerns about the increased traffic and the clear suburbanization of Martha's Vineyard. While we understand the need for affordable housing -this is a very poor option and having to accept 20+ 3800 sq foot mansions would completely change the character of the Island, the safety of its wildlife and the vitality of the Pond.

I would be glad to speak further as is helpful.
