

I hope the commission will act accordingly and deny the application for 38 possible units on meetinghouse Way in Edgartown. This is excessive and not safe for our natural resources and an inappropriate thing at this time. They were such a deep struggle here for housing and we are all worried about safety there is no reason to put in these houses. This cannot be a model for a future development on the Vineyard that any piece of land can be developed for anyone who comes in here and does it. Please deny this project it is not wise or consistent with your mission. Thank you for your consideration this is so important.

Lori Sue Herman
