

I have been following the expansion of the Hob Knob in the paper and was wondering where all the people who want to stop a sub division from being built are. This project is going to do more harm to the island than a few more homes. This will change the character of the entry to Edgartown and bring more people to downtown where more people are not needed. There are enough guest rooms on the island all ready and a new hotel in a residential district is not needed. Please do your job and protect the island character and not allow business expansion in a residential district. Vote no
