Hello,

I just wanted to reach out to say that I support the affordable housing initiatives on MV. My wife and I recently moved here because I accepted a position at South Mountain Co. A few carpenters retired at SMC and I came to help replace those positions. We've landed a seasonal rental but nothing permanent has come up yet. We want to be able to be positive additions to the island but to do so we need to find housing and be able to stay. We hope that affordable housing options become available. We have money... but just blue collar level amounts so house/ apt prices here are tough. We know that the island is changing, hopefully towards the positive, and we'd love to help it be a great year round community.
