

Dear MVC Commissioners,

This is a letter of support for Northern Pines Farm Subdivision dri 740. I support John and Janet Packer's application to subdivide their land. Through their farming the land, the Packers have prevented development of it, as they raised their family on this property, all the while contributing to the island as local business owners and elected public officials.

They wish now, to divide their land for their children. The land, they alone have preserved and will continue to preserve as farmland, for their children and future generations.

The Packers' neighbors have reaped the benefits of their labor for many, many, years abutting 40 undeveloped acres. It is time for John and Janet's children to also reap the benefits of their parents hard work as well as follow the exemplary example set by their parents of how to preserve and conserve the land. Knowing how these three were raised, I have every confidence they will make their parents proud. Sadly many children who grew up on this special island will not be able to stay please support the next generation of islanders.

Please support this subdivision.

Sincerely
Julie, Arthur Sierputoski
