

Hi - Here's a different topic.

The commission is asking for comments on the checklist amendments. We are concerned with 8.1 which currently states that a building has to be reviewed (if it's not in a district) if it was built before 1900.

I believe the wording should be 100 years old or older because specifying a year means the rolling age gets older every year after that one.

So now in 2020 a house has to be 120 years old.

The proposed revision has the same problem - you want it to say before 1920, meaning in 2021 a house has to be 101, and so on.

The Edgartown Historic District has sent a letter asking for a change in the wording.

Here's a copy of what we sent FYI.
