

September 7, 2011

Dear MV Commissioners,

As you know I have petitions in the amount of 3,000 signatures from Vineyard residents who are opposed to the Roundabout. Many more would sign but this number should be adequate for the purpose here. These individuals include Emts, town officials, commuters, bus drivers, fuel truck drivers & many others, all residents here on the Vineyard. They are looking to the DRI process to be adequately carried out since this is indeed an Island wide issue. The impact of the Roundabout project has not been studied as an Island wide issue as yet which is why it was referred to you. Thus far the project has only been studied as an Oak Bluffs project, a major error in the process as a whole. Now we have an opportunity to truly look at this major project as it affects all of us living, working and vacationing here on this precious and fragile Island.

Thank you, Madeline Fisher
