DESCRIPTION

Daikin ductless mini-split air handlers feature individual temperature control per room, motion sensors for automatic economy mode operation, and stylish, modern designs that fit in with any home decor. Daikin's ductless systems deliver continuous circulation and filtration quietly, with none of the noise and inconsistent airflow of older furnace and AC systems, all while doing so with greater efficiency and reduced maintenance costs and worries.

Ductless mini-split heat pump systems are perfect for old and new homes or buildings, regardless of whether they have existing ductwork installed. Couple that with Daikin's beautifully designed indoor air handlers and you have elegance and efficiency that will last for years to come, guaranteed.

18,000 BTU 17 SEER DAIKIN MINI-SPLIT MXL MULTI ZONE HEAT PUMP CONDENSER

Daikin Multi Zone MXL Series is the perfect fit for multi-room applications. You can connect two, three, or four indoor units to a single outdoor unit. The ability to choose from wall mount, duct units, floor mount, or ceiling cassette units offers you over 1000 options for your installation needs. The system also offers up to 17 SEER for home comfort and energy savings. The MXL Series is enhanced capacity performance in extreme heat and cold ambient conditions. With long-life filters and quiet operation, the MXL Series is a reliable and efficient solution for your home.

<http://www.shopperapproved.com/reviews/hvacdirect.com/>

- **Intelligent Eye** – An infrared sensor detects movement in the room. When the room is occupied, the unit will operate normally. If the room is vacant for more than 20 minutes, the unit automatically switches to an energy-saving mode.
