To: Alex Elvin <elvin@mvcommission.org>;

Commissioner Elvin:

I'm forwarding to you a list of patents for petrochemical synthetic turf with clickable links.  
This is something I work on as time allows.

The Synthetic Turf Council will go to great ends to protect their multi billion dollar per year industry.

You will notice that one of the donors listed, "Turf Dr. Phil," Phil M Stricklen, holds patents (Shaw Industries).

As hired guns try vociferously to deny PFAS is their plastic products, the patents clearly dispute their claims.
