To: Alex Elvin <elvin@mvcommission.org>; planningboard@oakbluffsma.gov <planningboard@oakbluffsma.gov>;

>>> To the Martha's Vineyard Commission and Oak Bluffs Planning Board,

I am a Tisbury resident of 20 years with two children at the Tisbury school. We have been very upset that the school continues to even consider using artificial turf for the athletic fields! The process has also been handled poorly with regard to so much outrage at this toxic proposal. The health of our children, community and delicate island environment are all at stake. My husband, children and I implore you to use natural grass and not the plastic fields that have been proposed!

>>>

>>> I would like to express our concern regarding the proposed plastic field at the Martha's Vineyard Regional High School. As environmental advocates and climate activists, we understand that converting a natural grass field to a plastic one runs counter to our collective goals and sends the wrong message to our youth.

>>>

>>> Now, more than ever, we understand that our planetary health depends on decisions large and small. We know we must break our addiction to the fossil fuel industry and instead invest in our soil to help it capture as much carbon as possible. We know we need to avoid the use of materials that further contribute to global warming and instead use plants to lower surface temperatures. We understand that to adapt to stronger and more frequent storms and wildfires, we must avoid materials incompatible with these events and instead take preventative measures. And we realize that we should avoid materials that add to our waste stream and instead embrace those that are regenerative.

>>>

>>> We ask that you please send a clear message to our youth that their future is our priority and reject the installation of plastic playing fields on Martha's Vineyard.

>>>

>>> Sincerely,

Emily Solarazza
