Subject: DRI 352-M2, MVRHS Athletic Fields

Dear Lucy,

I'd like to voice my opposition to the possible choice of Plastic Turf at the High School. Plastic does not belong on our island, and certainly does not belong in our school system. Besides the environmental impact a huge slab of plastic on the school grounds would make, there is the matter of where this huge slab would go when it did get worn out. To say nothing of the damage to the water table, the effects of warm weather on the plastic turf that our children would inhale, the unforgiving nature of plastic itself when a child might fall and scrape their skin, so many reasons that this is a bad idea.

Please deny this application for the future of our children and environment.

Sincerely,

Fala Freeman
