To whom it may concern

On behalf of my wife, Christina Gomes and myself, I would like to offer our full support of the Callahan's family intent to renovate the property at 9 Beecher Park.

As abutting neighbors at 17 Plymouth Avenue, we appreciated the Callahan's open dialog with us to share their architectural plans and family vision while considering our feedback and concerns. We were thrilled to see the new design of the home with the intent of keeping with the Victorian charm of the East Chop neighborhood.

Our family had recently renovated our home while working with the Sullivan & Associates Architects. We understand first-hand the importance of working collaboratively with the neighboring residences, the town of Oak Bluffs and the Island of Martha's Vineyard to maintain the charm of the island while building a home for future generations. It is evident that the Callahan family has taken every step to ensure that their vision would enhance our neighborhood and not be an impediment to the intrinsic value that has already been created.
