SITE PREPARATION NOTES

1. Erosion Control Progress Report Form: The site must be prepared by an approved erosion control contractor prior to commencement of construction.
2. The site will be surveyed and staked prior to the beginning of construction. The survey will be used to establish the boundary lines of the project site.
3. Erosion control measures must be installed and maintained throughout the construction period.
4. The contractor will ensure that all erosion control measures are installed and maintained in accordance with the approved plans and specifications.
5. The contractor is responsible for ensuring that all erosion control measures are installed and maintained in accordance with the approved plans and specifications.
6. All materials used for erosion control must be approved by the local authority.
7. The contractor shall be responsible for all damages to existing trees and vegetation caused by the construction process.
8. The contractor shall be responsible for restoring the site to its original condition after the completion of the project.
9. The contractor shall be responsible for all claims and damages arising out of the construction process.
