Hangatr G.pdf; ATT00001.htm;

Alex,

Attached is a floor plan of the location where the hangar tenants will park their cars.

There will be no employees as a result of this project, these are garages for airplanes no need for employees. I manage the Hangars and have been doing this for 38 years as I said in an earlier email,

Gary BenDavid will also be managing.

As far as Impervious surface areas, you have all the information, look at the drainage plan.

This hangar is regulated and overseen by the Airpot Commission.

FYI this hangar is garaging planes that are already parked at the Vineyard Airport. We are not bringing new planes to the Airport.
