Hello Alex,
I just left you a voicemail, but anted to follow up on your voicemail question from yesterday. The proposed impacts at 10 State Road that you asked me to review require minimal ground disturbance, and as noted in my earlier email are proposed to occur entirely within fill soils. I think that provided you give the WTGH/A THPO the opportunity to review the plans and PAL’s recommendations and provided the THPO agrees that no additional archaeological study is warranted, it’s my professional opinion that you do not need to request MHC review and concurrence.

Let me know if you have any other questions.

Thanks,
Holly

---

Hello Alex,
I’ve just had a zoom meeting pushed back by ½ hour, so if it works for you, can I call you at about 1:30pm instead of 1pm? I pulled out the PAL project notes and graphics, so think I can give you the information you’re looking for.

Thanks,
Holly

Thanks, Alex-
I'll pull out our project mapping to review these areas. I have another call scheduled from 9:30-11:00 on Monday; could we talk before or after that time slot?

Have a good weekend,
Holly

Hi Holly,

Thanks for getting back to me. Could I give you call on Monday around 10AM?

The project site is 10 State Road, Tisbury. Our current webpage for the proposal is available [here](#), and I'm also attaching a revised proposal from the applicant that we received a couple days ago. The revised proposal shows that the trees will not be uprooted, but ground down to the stumps, with maybe 1-2 feet of nearby fill removed. This is all on the eastern side of the property.

Best,

Alex

Subject: State Road Project

Good morning, Alex-
I got your voicemail yesterday and would be happy to talk with you. Could you let me know which State Road property you’re currently reviewing? We’ve completed work at 3 adjacent State Road properties in/around the Vincent Site, and I’d like to pull out the files before we talk.

I’m in the office all day today and next week if there’s a good time to connect.

Best,
Holly
