To: Alex Elvin <elvin@mvcommission.org>;

To the MVC,

More and more information is surfacing about the problem with plastic turf. But some of it has been around for years, as when the National Women's Soccer Team refused to play on artificial turf, in line with what the men had done. See: <https://time.com/4140786/womens-soccer-team-turf/>  
It looks like the women will finally win their case. Let's make it happen here too, please, for the health of our children.

Thank you,  
Jed Katch  
Chilmark
