Dear Mr. Salzburg,

My name is Jeffrey Kominers. I live in West Tisbury and I would like to submit written testimony on the New England Wind 2 connector cable matter before the MV Commission later today.

I ask that the Commission approve the NE Wind 2 cable. It is to be securely embedded beneath the seabed and protected with very solid insulating material.

Furthermore, the NE Wind 2 connector cable will be in the same corridor as the already fully vetted and approved export connector cables of the Vineyard Wind 1 and NE Wind 1 offshore wind projects.

The NE Wind 2 project will be contributing \$8 million to Martha's Vineyard to help the Vineyard achieve its goals of converting its reliance on fossil fuels to green energy.

I again request the MV Commission to approve the NE Wind 2 connector cable and enable Martha's Vineyard to continue its pivotal role in the region as an important leader in the transition to green energy and in overcoming the deleterious effects of climate change.

Thank you for considering my testimony.

Kind regards,

Jeffrey
