

To Whom it May Concern,

At the very beginning of this pandemic, I was fortunate enough to be offered a job at The Harbor View Hotel and I have been with the company since. Prior to my interview I had never been to Martha's Vineyard. It did not take more than one visit for me to understand just how special this place is.

Bernard Chiu has taken every step to preserve the historical significance of the property and land while restoring its beauty. I have been afforded a very rare opportunity to work for an owner who sees and cares for the business, the property, the land, and the people beyond the bottom line.

The proposed spa will not increase the size or footprint of any structure. It will only update it to the standards the rest of the property has been brought to. The spa will not create more car traffic. Like the renovations that have been completed to the property in the past the design will be true to Martha's Vineyard.

Thank you for your time and considerations.

Sincerely,

Susan Pizza
