Surprising Opposition - Rebuttal

To the Editor:

I have been living in the neighborhood of the proposed Bradley Square project for over thirty years. I am opposed to this project presented because of the added buildings size. If the buildings were down-sized to blend with the area and contain their needs it would be more acceptable.

From this position I would like to address the the above entitled "Surprise Opposition." I am greatly offended by remarks made by one Holly Alaimo, (and others) about my neighborhood. Her statements about this area are her re-creations of events which occurred many years ago. I do know that in my thirty years of living in this neighborhood a drug raid did happen and became history. There has never been a flop house. There are no rented shacks with no running water, and her insensitivity to an unfortunate death as deceitfully mentioned as well as the above listed statements show that her mentality is warped caused by an imbecilic immorality which serves no good purpose except to upset a peaceful neighborhood. She believes by her written thoughts, no matter what improvements come to the neighborhood, for her there will always be a low-life.
