Good morning,

ATC proposes the following in connection with the Monopine extension and AT&T collocation project at 21 New Lane Vineyard Haven, West Tisbury MA:

- The cleanup of existing fallen faux branches and needles within the compound and surrounding area will be completed at the time of the installation of the proposed extension.
- Replacement of existing weathered branches that are not affected by the extension design will also be completed at the time of the extension installation.
- An annual site inspection will be done to assess current conditions and confirm maintenance and cleanup needs, to be completed by our current standard of care process.

Thank you,

**Gary Waitt**
