Subject: turbine regulations

Hello,

recommendations for inclusion in laws covering turbines on Martha's Vineyard

1. Any windmill or turbine of any height on any property is subject to public review with notifications in newspapers posters, other communication methodologies, once a permit of any kind is requested.
2. All abutters are notified of the request for a permit for a windmill, turbine of any height specifically by mail, email, phone
3. public meetings for comment are held
4. each request for a permit for a turbine must include a management plan which is crafted by the person requesting a turbine and the abutters
5. Appropriate committees consider reasonable parameters having thoroughly studied all pertinent laws.
6. No turbine request is to move forward without rights of abutters being included in the process.

Just found out about the deadline. Sorry for the delay

Sincerely,

Jane Schlesinger
