**Martha's Vineyard Hospital – Navigator Homes Nitrogen Analysis**

**Acronyms:**

MVH: Martha's Vineyard Hospital  
NHMV: Navigator Homes of Martha's Vineyard, Inc.  
WQMP: MVC Water Quality Management Policy v13 (1/12/18)

**Site Conditions:**

Locus lies entirely within the Sengekontacket Pond Watershed.  
Adjusted Nitrogen Load Limit: 2.02 kg/acre/year per WQMP  
Locus does NOT lie within Zone II of a municipal well  
Total lot area: 27.53 acres

**Project Notes:**

**Runoff Areas:**

Roof area runoff to subsurface disposal:	90,820 sq ft
Roof area runoff to vegetated surface disposal:	0 sq ft
Impervious pavement to subsurface disposal:	0 sq ft
Impervious pavement to vegetated surface disposal:	94,006 sq ft
Pervious pavement to subsurface disposal:	0 sq ft
Pervious pavement to vegetated surface disposal:	0 sq ft

**Waste Water Parameters:**

Effluent strength: 8 mg/l (per MVC staff and Klean Tu)

Flow Estimates per WQMP:

Green House Homes: (150 GPD/bedroom)(60%) = 90 GPD/bedroom  
Workforce housing: (67,700 GPY/unit)(90%) / 365 days/yr = 167 GPD/unit

**Analysis:**

$$[N(r) + N(l) + N(w)] < N(a)$$

N(r) Runoff N-load:

Roof runoff to subsurface disposal:

$$(3.91 \text{ ft/yr})(90\%)(90,820 \text{ sf})(28.32 \text{ l/cf})(0.75 \text{ mg/l}) / (1\text{M mg/kg}) = 6.79 \text{ kg/yr}$$

Roof runoff to vegetated surface disposal:

$$(3.91 \text{ ft/yr})(90\%)(0 \text{ sf})(28.32 \text{ l/cf})(0.38 \text{ mg/l}) / (1\text{M mg/kg}) = 0.00 \text{ kg/yr}$$

Impervious pavement runoff to subsurface disposal:

$$(3.91 \text{ ft/yr})(90\%)(0 \text{ sf})(28.32 \text{ l/cf})(1.50 \text{ mg/l}) / (1\text{M mg/kg}) = 0.00 \text{ kg/yr}$$

Impervious pavement runoff to vegetated surface disposal:

$$(3.91 \text{ ft/yr})(90\%)(94,006 \text{ sf})(28.32 \text{ l/cf})(0.75 \text{ mg/l}) / (1\text{M mg/kg}) = 7.02 \text{ kg/yr}$$

Pervious pavement runoff to subsurface disposal:

$$(3.91 \text{ ft/yr})(65\%)(0 \text{ sf})(28.32 \text{ l/cf})(1.50 \text{ mg/l}) / (1\text{M mg/kg}) = 0.00 \text{ kg/yr}$$

Pervious pavement runoff to vegetated surface disposal:

$$(3.91 \text{ ft/yr})(65\%)(0 \text{ sf})(28.32 \text{ l/cf})(0.75\text{mg/l}) / (1\text{M mg/kg}) = \underline{0.00 \text{ kg/yr}}$$

$$N(r) \text{ total:} = 13.81 \text{ kg/yr}$$

N(l): Landscape N-load:

$$(120,000 \text{ sf})(3 \text{ lb/1000 sf})(20\%) / 2.205 \text{ lb/kg} = 32.65 \text{ kg/yr.}$$

N(w): Waste water N-load:

Estimated flow:

66 bedrooms @ 90 GPD/bedroom =	5,940 GPD
32 units @ 167 GPD/bedroom =	<u>5,344 GPD</u>
Total:	11,284 GPD

N(w) enhanced (Klean Tu) denitrification:

$$(11,284 \text{ GPD})(3.785 \text{ l/gal})(8 \text{ mg/l})(365 \text{ days/year}) / (1\text{M kg/mg}) = 124.71 \text{ kg/year}$$

N(a): Allowable N-load:

$$(2.02 \text{ kg/acre/yr})(27.53 \text{ acres}) = 55.61 \text{ kg/yr}$$

$$[N(r) + N(l) + N(w)] < N(a)$$

$$N \text{ total} = 13.81 \text{ kg/yr} + 32.65 \text{ kg/yr} + 124.71 \text{ kg/yr} = 171.17 \text{ kg/yr}$$

$$\text{Overage: } 171.17 \text{ kg/yr} - 55.61 \text{ kg/yr} = 115.56 \text{ kg/yr}$$
