Traffic Crashes from 2012 thru 2014 and Injuries from Crashes

These two maps display traffic crash data from 2012 thru 2014. This is the latest data available from MassDOT at this time. While the down-Island inset maps show the individual crash sites, the Island-wide view clusters the data together for every 75m. Crashes are reported by the Town's Police Department to the Registry of Motor Vehicles. MassDOT then receives this data and geo-locates each crash. Data omissions do exist on these maps since report submission varies by Police Department and MassDOT is unable to geo-locate all crashes due to insufficient location information.

In-Season Population Density with Year-round & Seasonal Population Breakdown

This map displays the population density on Martha's Vineyard within each TAZ (Transportation Analysis Zone). In general, a TAZ is similar to a neighborhood. In addition, for each TAZ, the map shows the breakdown of the population count in terms of total 'Year-Round Population', 'Guests of Year-rounders', and 'Seasonal Population'. The data are based on the US Census of 2010. The guests and seasonal population are estimates generated by the MVC based on Census Block population count and Housing Units occupied vs vacant. See the map notes for more details. Map created by the MVC - Oct. 2016.

West Tisbury Overlay Zoning Map -- Goin' INTERACTIVE

This interactive map allows you to search for a parcel by physical street address and then turn on/off each of the Overlay Zoning Districts. Many of the overlay zones overlap each other. So to aid in clearly identifying which zone(s) are present in an area, the MVC created this interactive map.

You are strongly encouraged to have fun and explore. Don't be afraid to click on those funny looking icons. I promise you, you won't break it. This app does not require downloading any software. It should work on your iOS or Android SmartPhone as well as your desktop internet browser.

Please contact Chris Seidel (MVC's Cartographer) if you have questions or comments. seidel[at]mvcommission.org
