**Subject:** Proposed Modification of Harbor View Hotel

To Whom It May Concern:

I am writing in regard to the proposed modification of the Harbor View Hotel. I have been a property owner in Edgartown since 2008 and have had first hand experience with the negative impact of construction on our small community. Several years ago a subdivision was developed on the end of Mullen Way for homes that are primarily rental income investments. The increase of noise and the steady stream of construction vehicles on our narrow street has been incredibly disruptive for the neighborhood. Several neighbors have had issues with vehicle damage to their lawns and trucks continue to speed down our once-quiet street, which is home to numerous children and grandchildren.

If the Harbor View is allowed to continue with their development plan I believe the impact to the abutting neighbors on North Water Street and Star Buck Neck will be equally disruptive. The increased flow of traffic will certainly put an considerable strain on the already tight roads and parking, not to mention hinder the walkable charm of this part of the island. I plead that the MVC please consider that the proposed enhancements to the Harbor View will come at a detriment to the community's infrastructure and the quality of life of its neighbors. Thank you so much for your time.

My best,  
Magy Littlejohn
