Hello,

I believe in grass fields. I was one of the people who originally requested the Chilmark selectmen refer this project to the MVC. I appreciate that it is traveling through the process our community has in place for regional development.

I also appreciate all of volunteer hours that are put into reviewing projects.

Thank you for listening closely and for being thoughtful in your decision making process.

One of the lessons of the pandemic is the need for a high school that has good ventilation and is cleanable. I hope our resources and time will be focused on a new school.

I did sign the group letter sent in from the Field Fund.

Gratefully,

Mary Beth Grady
