Subject: North Bluff Sea Wall Project DRI #659

Dear Mr. Foley,

I am writing out of concern for the design proposal for a steel bulkhead seawall on the North Bluff in Oak Bluffs. This area is an important entryway into the town and I do not believe that this design is appropriate. There was very little notice given to residents about the planning of this project until it was all complete. I am relieved that the project is coming before the Martha's Vineyard Commission, at least at this point, and hope that you will agree to conduct a thorough review despite the late timing of the request. This project will have a huge impact on the beaches of our town which are an important resource to us. I believe it is crucial to share more information about the project and allow more public input. Thank you for considering this review.

Sincerely,

Kathy Laskowski
