Greetings Alex, this is my hen scratching to represent the additional cars to total 120(ish).

This is all on premises but know also that in years past, even long before our DRI in '91, we could rely on parking on our hill along the west (left) side of our driveway which can hold 50 or more cars as well as along one side of Lighthouse Rd as we see routinely in our community when residents host large parties, funerals, town meetings, etc. additionally, when we have hosted events with thousands of visitors, we have had access to the town's parking lot holding many cars where guests either walk over or have been provided conveyance by van, carriage and hay wagons. Know, of course, these events are not anticipated as any regular occurrence or even annually, but since there are presently no prohibitions in our town restricting these occasional uses, we would like to preserve our ability to do so until our town takes restrictive steps. Also, any of the larger events like some we have done in the past, concerts, demo derbies, and other benefits, beyond wedding type events, where we invite the public, we seek approval from our BoS to specifically address those singular large events and the concerns of neighbors, boards and logistical considerations of our fire and police chiefs.

All probably too much information, but possibly a tid bit here and there to help explain our request for modification in this regard.

Hugh
