CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Good morning, Rich. I noticed online Ross's response to follow-up questions, including the School's response to providing adequate sound abatement fencing along the Staneks' property. As property owners abutting the School's current outdoor playground, we concur fully in the Staneks' request.

As I have previously indicated, from our property (99 North William Street, extending to the beginning of the pavement on Locust Lane), the noise level from crying children and other sources (banging of pots and pans) has at times been borderline deafening. The current fence provides absolutely NO sound abatement.

In addition, the images I have previously provided clearly show that no regard was given to the destruction of mature trees bordering, if not on, our property. We therefore renew our request that adequate sound abatement be provided on the border to our property, and that trees similar to those previously destroyed be replanted.

Due to previous commitments, we will be unable to join the Zoom meeting tonight, but am generally very accessible via this email and by my cell - 914-760-0386.

Please see that this is presented to the Commission and posted as appropriate. Many thanks.

Sincerely -

Andrew A. (Andy) Peterson
